

AQUACIDE

Special

DRINKING WATER ACIDIFIER + PURIFIER. NON FOAMING, HIGHLY ACID

ADVANTAGES

The combination of organic acids and minerals enables powerful acidifying and purifying action for the whole digestive tract: very economical and efficient. Prevents noxious bacteria and fungus development with good sanitisation.

USES

Drops pH in livestock drinking water for poultry, pigs, cattle etc. De-scales and cleans water systems.

INSTRUCTIONS FOR USE

Premix at 1.2L in 200L of potable water after adding the RS AquaBig at 300ml and inject this parent solution at 1% through a doser into the water supply.

Do not pre-mix alone. Dose AQUACIDE Special alone only with an acid resistant dosing pump at the following dilutions depending on the initial water hardness and pH:

from 10 to 30 ppm (10 to 30 g / m³ water) for poultry. Recommended pH 5.2 and 6.2.

from 20 to 50 ppm (20 to 50 g / m³ water) for pigs, turkeys, ducks and other animals. Recommended pH : between 4.8 and 5.8.

CHARACTERISTICS

Nearly colourless and odourless transparent liquid.

Not flammable and non-foaming.

pH at 10 ppm = 6.5 (for initial water pH of 7.2)

pH at 20 ppm = 6.2 (for initial water pH of 7.2)

SAFETY & ENVIRONMENT

Corrosive : contains sulphuric acid.

DCO (Oxygen chemical need) = 224 g/l O₂.

Does not contain hydrochloric nor nitric acid.

Hazardous : follow instructions for use and read the safety data sheet.
