

# DRYSAN®

Product Features Sheet for

## What is it?

**DRYSAN** is a proven and tested, micro-granular disinfectant with a pleasant citrus fragrance, based on a calcium complex which is low dust, pH neutral, safe on skin and does not cake in the bag.

## How do you use it?

**DRYSAN** should be spread at the rate of 50gm (a good handful) per square metre or up to a centimetre deep in high traffic areas round feeders, drinkers, pop holes and on ramps. Drysan is successfully mixed with shavings, straw, sawdust and other bedding materials. Cow mats, timber, metal and treated floors are not affected because Drysan is non-corrosive.

## What does it do?

**DRYSAN** is an effective slow release disinfectant which controls many food spoilage and infectious organisms in bedding, cubicles, horse boxes, nest boxes, lambing and farrowing pens, kennels and cages. It is particularly effective for drying feet and avoiding the consequences of standing in muck and wet conditions. **DRYSAN** is entirely safe on teats, paws and all skin and is harmless if pecked or ingested by animals.

**DRYSAN** is effective against coliforms, staphs, streps, clostridia, campylobacter, aspergillus and many other infectious organisms, as well as those that cause harmful and unpleasant sulphur and ammonia compounds.

**Pack size:** 5k & 25k bag
