

Product Features Sheet for: **PERSEUS®**

What is it? *The only patented peroxygen udder hygiene product. Ready to use optimum formulation for outstanding performance and skin care, with blue/green activity indicator. Twelve percent emollients.*

How do you use it? *Activate the **PERSEUS Solution B** with the small container of **PERSEUS Activator A**. Immediate colour change from blue to green indicates PERSEUS is ready to use. Apply pre and post by spray or immersion. Follow with a cheap dry wipe before milking. Use to spray or dip clusters without rinsing. No risk to the teats or milk.*

What does it do? *Cleans, instantly kills micro organisms and conditions without residues, taint or the formation of trihalomethane DBPs (disinfectant by-products) which derive from iodine and chlorine. **PERSEUS** is effective against all the spoilage and infectious organisms encountered in the dairy.*

Who needs a sticky 'barrier' to pick up chaff and dirt when you can achieve this level of control? Totally food safe.

Do: *Apply carefully with a spray nozzle that gives coverage without run-off. Mix a new batch when the colour goes clear (40 to 50 days). The clear solution is still fully effective for a week.*

Don't: *Stir to mix or contaminate in any way. Do not add any other product; the formulation has everything you need. Do not rinse.*

Pack sizes? *25litre*
